

ALEXSM Résumé Parsing Software

Turn thousands of résumés a day into value for you and your clients

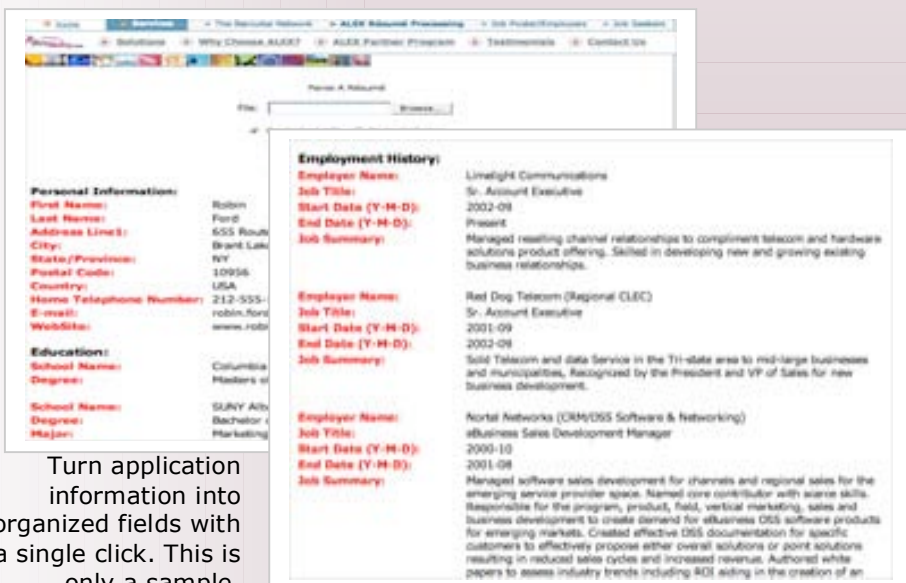

With ALEX Résumé Parsing software, HireAbility addresses one of the biggest problems in human resources and recruiting organizations--*how to manage the deluge of résumés cost effectively.*

Deliver Integration ROI

Studies indicate that recruiters using ALEX can reduce **data entry and verification costs by approximately 80 percent**, while cutting time-to-hire. For an office receiving 50 resumes per day, this could amount to a savings of \$37,000 per year.

Software-as-a-Service (SaaS)

With HireAbility's hosted solutions, your labor amounts to a one-time connection to our Web service. Our hosted solutions offer both a per-transaction pricing model and an annual subscription model. This makes licensing our superior technology feasible for any size company, from a new software startup, large volume job board, worldwide corporation or a vendor with thousands of users.

Turn application information into organized fields with a single click. This is only a sample.

PARTNERS, ATS HCM AND HRIS PROVIDERS

By partnering with HireAbility, you will be able to offer your customers a model that maps to their current business. Our technology generates proven revenue stream and generates a significant and measurable ROI for your customers. In addition, our SaaS requires minimal integration, has a fast time to market, and enables our partners to focus on their core competencies.

DIFFERENTIATE YOUR PRODUCTS

Client-customizable skills lists
Fast data turnaround
Accurate worldwide address processing:

- Linguistic analysis
- Contextual analysis
- Standardization/optimization

True, multiple language support (same accuracy as English)
Additional language support (quick port to new languages by linguistic experts)
Improved search results
Electronic and paper resume solutions

EASY INTEGRATION

Windows or Linux/Unix platform
SOAP interface available
One executable
Multiple deployment configurations:

- Platform independent
- Hosted or installed
- Software developer's kit
- VAR/OEM
- .NET Web service

Highly configurable I/O (match configuration choices to needs of individual clients)
Scalable grid architecture (also licensable individually)

ALEX™ Résumé Parsing Software

Product Datasheet
